Questions asked and answered of staff included: is Council deciding the fate of certain site projects tonight; a question about the number of minimum affordable housing that is required for developments in this plan; Is there a magic number to balancing out the FAR numbers; why would we not want to balance out the FAR in the Downtown district like the city has for other districts; why would there be a cap on the maximum number allowable for affordable housing; parking questions with regard to expanding the in-lieu fees, are there any thoughts to using that fee towards buying private parking spaces or other ways to reduce parking; can legal respond to questions raised about the EIR, increased affordability, artist/work live housing, priority to allow residents for those who work in Santa Monica as part of the downtown plan; address displaced residents, will units be replaced for those who lose their units; car share options; how much of the parking from the hotels can be in a centralized parking location that doesn't create big digging projects for underground parking; parking maximums, and what that should be, and provide incentives; 4th and 5th and Arizona project; and, shared parking downtown to facilitate allowing private property to allow parking instead of the developer providing parking.
